

1. The lamp head wire passes through the hole in the middle of the hardware square tube.

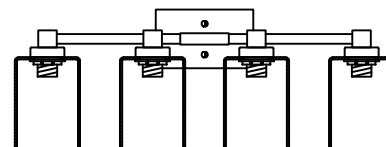

2. Pass the lamp head wire through the hardware box again. Align the accessory screws with the box holes and lock them into the holes of the hardware square tubes, then tighten them to prevent them from moving.

4. The white line N-pole and black line L-pole of the lamp are connected to the reserved power line above the wall, and the ground wire is connected to the reserved ground wire above the wall. Align the mounting hole position of the hardware disk with the mounting hole position of the mounting plate, and tighten the nut to secure it to the wall.

5. Place the glass cover smoothly on the lamp holder shelf.

3. Do not use gasoline or water to wipe the lamps and lanterns, do not arbitrarily pull and twist the wire in order to avoid the danger of bad contact fire and electric shock, clean the lamps and lanterns with a clean soft cloth, there will be temperature attention to prevent burns when the lamps and lanterns work.
